1 EXECUTIVE SUMMARY

Pan American Engineers, LLC (PAE) has performed a Phase I Environmental Site Assessment (ESA) on a 42± acre tract located at and around 2101 Frank Andrews Blvd, near Alexandria, Rapides Parish, Louisiana (the *property*).

This ESA was conducted in conformance with the scope and limitations of the American Society for Testing and Materials (ASTM) Practice E 1527-13, for the *property*. Deviations from ASTM E1527, if any, are described in Subsection 11.0.

This Assessment is based on a study of historical land use of the *property* and adjacent properties, historical maps, practically available information, interviews and direct observations made at the *property*.

Findings

<u>Site Reconnaissance</u>: The current use of the majority of the *property* is vacant overgrown pastureland. The *property* also contains four abandoned structures. The *property* is bordered to the north and east by Union Tank Manufacturing Plant, on the south and west by commercial/industrial businesses and by a railroad on the west. Properties located adjacent or within close proximity to the *property* appear to be commercial, residential, and industrial. The current and past uses of the adjoining properties and surrounding areas do not appear to have changed in recent history.

<u>Site History Findings</u>: The USGS Topographical Maps depict the *property* as first being developed at some time between 1932 and 1941.

<u>Regulatory Agency Findings</u>: A search of EDR's available standard environmental record sources revealed that seven mapped sites were found in EDR's search of available government records either on the *property* and/or surrounding areas. This information can be found in *Appendix D - Regulatory Records Documentation*.

Conclusions

This Assessment has revealed evidence of **one recognized environmental condition** on the *property*. This condition is as follows:

• The *property* was found in multiple databases. This finding is considered to be a controlled recognized environmental condition, which is a recognized environmental condition. See Opinion 2 in Section 9 for more information on this recognized environmental condition.

2 INTRODUCTION

Pan American Engineers, LLC. (PAE) was authorized to perform this ESA on July 21, 2015 by England Economic & Industrial Development District for the *property* (See Appendix A - Site Map).

2.1 PURPOSE

The purpose of this ESA is to conduct an investigation, to the extent feasible, of a parcel of commercial real estate with respect to a range of delineated environmental conditions, contaminants, within the scope of the Comprehensive Environmental Response, Compensation and Liability Act (CERCLA) and petroleum products. As such, this report is intended to permit a user to satisfy one of the requirements to qualify for the *innocent landowner*, *contiguous property owner*, *or bona fide prospective purchaser limitations* on CERCLA liability. The standard of defense is practices that constitute "all appropriate inquiry into the previous ownership and uses of the property consistent with good commercial or customary practice" as defined in 42 U.S.C. § 9601 (35) (B). This investigation was conducted in accordance with ASTM E 1527-13, which delineates criteria for conducting a Phase I Environmental Site Assessment.

2.2 SCOPE OF WORK

The scope of services for this Phase 1 includes the tasks below:

- Conducting a reconnaissance of the property and surrounding properties to visually check for indications of land use and storage use of hazardous substances/materials and chemicals, petroleum products, and other controlled/permitted substances;
- Reviewing information provided by the Client;
- Reviewing historical documents, aerial photographs, and topographic maps to construct a general history of the site development;
- Reviewing recorded environmental liens and deeds identified by EDR;
- Contacting other pertinent offices, departments, and information sources as necessary to complete our understanding of site use;
- Preparing this report to document the research and the findings of this ESA.

2.3 SPECIAL TERMS AND CONDITIONS:

In defining a standard of good commercial and customary practice for conducting an ESA of a parcel of property, the goal is to identify recognized environmental conditions. The term "recognized environmental conditions" means the presence or likely presence of any hazardous substances or petroleum products on a property under conditions that indicate an existing release, a past release, or a material threat of a release of any hazardous substances or petroleum products into the ground, groundwater, or surface water of the property.

The term is not intended to include *de minimis* conditions that generally do not present a threat to human health or the environment and that generally would not be the subject of an enforcement action if brought to the attention of appropriate governmental agencies.

This investigation does not address requirements of any state or local laws or any federal laws other than the appropriate inquiry provisions of CERCLA's innocent landowner defense. Terminology and definitions used herein and the methodology to conduct the ESA are in accordance with those definitions, terminologies, and practices described more fully in ASTM E 1527-13 and shall govern use and limitations of this report.

2.4 EXCEPTIONS OF ASSESSMENT

Field observations and research reported herein are considered sufficient in detail and scope to form a reasonable basis for a general environmental assessment of the *property*. This investigation was conducted in accordance with ASTM E 1527-13, which provides established criteria for conducting a Phase I Environmental Site Assessment. The findings and conclusions contained herein were promulgated in accordance with generally accepted environmental assessment methods, only for the *property* that is described in this report. These environmental methods were developed to provide the client with information regarding apparent suspicions of existing and potential adverse environmental conditions relating to the *property*. These were necessarily limited to the conditions observed at the time of the site visit and research.

The report is limited to information that was available at the time it was prepared. In the event additional information becomes available, the client will forward it to the consultant for their consideration and vice-versa. There is a possibility that conditions may exist which could not be identified within the scope of the assessment or which were not apparent or accessible during the site visit. There may exist on the *property* certain environmental conditions that are beyond the scope of this report, but may warrant consideration by parties to a commercial real estate transaction. Though the information represented herein is believed to be reliable, there is no express warranty that the information provided by others is complete or accurate.

This ESA may be presumed to be viable for no more than 180 days. The possibility should be recognized that conditions affecting environmental concerns could change materially during this viability period due to the action of others or due to off-site influences. If such changed conditions do occur during the viability period, the use of this report (other than immediate) is expressly prohibited unless the consultant makes a current investigation of those changed conditions. This would include a new site reconnaissance, interviews and an updated review of the records.

This assessment has been prepared for the sole use of the stated client. It may not be reproduced or edited without the written approval of the consultant. This report may not be assigned to others without full agreement to the general terms and conditions under which it was performed. No other warranties are implied or expressed.

2.5 LIMITING CONDITIONS

The governmental records data investigated may not include information on all environmental hazards or on all adjoining sites that may include environmental hazards. Said data may also be inaccurate or incomplete.

Paved surfacing may have prevented observation of an environmental hazard.

3 SITE INFORMATION

3.1 Location and Legal Description:

The *property* is located approximately 0.26 miles northwest of the intersection of England Drive and Vandenburg Drive, near Alexandria, Louisiana. The *property* is illustrated on the survey provided in *Appendix A - Site Map*.

The *property* is identified as a portion of Parcel ID. 2903072031002901 in the Property Tax Files (*Appendix C - Historical Research Documentation*). The *property* is also shown on various other aerial maps contained within *Appendix C - Historical Research Documentation*.

3.2 Site and Vicinity General Characteristics

The majority of the *property* is vacant pasture land. There are four on-site buildings which appear to be abandoned. The vicinity's general characteristics are mixed residential, commercial and industrial. Refer to Section 6 – Site Reconnaissance for additional information.

3.3 Current Uses of the Property

The majority of the *property* is vacant pasture land. There are four on-site buildings which appear to be abandoned.

3.4 Current Uses of Adjoining Properties

The *property* is bordered to the north and east by Union Tank Manufacturing Plant, on the south and west by commercial/industrial businesses and by a railroad on the west.

4 USER PROVIDED INFORMATION

4.1 Title Records

No title records were provided by the user.

4.2 Commonly Known or Reasonably Ascertainable Information

Pan American Engineers are the long-standing Engineers for the England Authority and as such, has on file all commonly known or reasonably ascertainable information that the user may have been able to provide, as indicated by David Broussard, Airpark Development Manager for England Authority.

4.3 Owner, Property Manager, and Occupant Information

As of the date of this report the owner of the *property* is the England Authority, represented by David Broussard, Airpark Development Manager.

4.4 Other

The user of the Phase I Environmental Assessment is England Authority represented by David Broussard, Airpark Development Manager.

5 RECORDS REVIEW

5.1 Standard Environmental Record Sources

In accordance with ASTM 1527-13, Pan American Engineers has reviewed records that are reasonably ascertainable. Records that are reasonably ascertainable are information that is publically available, obtainable within a reasonable amount of time and cost and is practically reviewable.

5.1.1 EDR Mapped Sites

Pan American Engineers subcontracted with Environmental Data Resources, Inc. (EDR) to provide a search of standard environmental record sources within the approximate minimum search distance as defined by ASTM 1527-13 (*Refer to Appendix D - Regulatory Records Documentation*). The EDR Radius Map includes the name, date request for information was filled and date information provided was last updated by source. Seven mapped sites were found in EDR's search of available government records either on the *property* and/or surrounding areas and can be seen in the chart below. The complete EDR Report can be found in *Appendix D - Regulatory Records Documentation*.

Map ID	Site Name	Address	Standard Environmental Record
1	AVTEL SVCS, Inc.	1215 Kegleman Blvd. (the <i>property</i>)	RCRA NonGen/NLR, FINDS (Higher Elevation)
2	Unknown	330 Vandenburg Dr. (the <i>property</i>)	EDR US Hist Auto Stat (Higher Elevation)
A3	England Air Park	1100 Frank Andrews Blvd. (the <i>property</i>)	LA UST, LA NPDES (Higher Elevation)
A4	TSA At Alexandria Industrial	1100 Frank Andrews Blvd. (the <i>property</i>)	RCRA-CESQG (Higher Elevation)
5	The Hertz Corporation	Hertz Rent-A-Car	FINDS, LA UST, LA DEL SHWS, LA NPDES, LA REM (Higher Elevation)
6	Former England AFB	1611 Arnold Dr. (the <i>property</i>)	LA SPILLS, LA NPDES, LA AIRS, LA REM, LA ASBESTOS (Higher Elevation)
7	EEIDD	1611 Arnold Dr. (the <i>property</i>)	RCRA-TSDF, CERCLIS, CORRACTS, RCRA-CESQG, NY MANIFEST, 2020 CORACTION (Lower Elevation)

Although Map ID numbers 1, 2, A3, A4, 6 & 7 were not identified as being located on the *property*, they are assumed to be located on the *property* as they lie either extremely close to the uncertain property bounds as shown on EDR's report or their address is considered as a mailing address as oppose to physical address.

5.1.2 EDR Unmappable Sites

EDR reports no unmappable site.

5.2 Physical Setting Sources

The 2003 USGS Topographic Map (Boyce Quadrangle, 7.5 Minute Series) illustrates the *property* and surrounding areas. The Map shows nearby structures, roads and tanks. Historical aerial photographs and topographical maps, in *Appendix C - Historical Research Documentation* show the *property* and surrounding areas. EDR Geocheck Report in *Appendix D - Regulatory Records Documentation* includes additional information on the surrounding area.

5.2.1 Topographic and Hydrology Information

The *property* is relatively flat and is approximately 85 feet above msl according to the 2003 USGS Topographic Map. The site is assumed to drain into Irish Ditch No. 2 thence into Bayou Rapides and ultimately into the Red River.

5.3 Historical Use Information on the Property

The objective of consulting historical sources is to develop a history of the previous uses of the *property* and surrounding areas in order to help identify the likelihood of past uses having led to recognized environmental conditions in connection with the *property*.

The following historical sources were utilized to determine previous uses:

- Aerial Photographs (*Appendix C Historical Research Documentation*)
- USGS Topographic Maps (*Appendix C Historical Research Documentation*)

Pan American Engineer's past experience indicates that in Rapides local street directories, building department records and zoning/land use records are not reasonably ascertainable and/or are not likely to be sufficiently useful, accurate or complete in satisfying the objectives.

The aerial photographs (1955-2010) show the *property* as developed. The aerial photographs show an increasing amount of development as time progressed. The aerial photographs show the fuel tanks which once existed on site along with roads and other miscellaneous structures.

The USGS Topographical Map (1932) shows the *property* as undeveloped. The USGS Topographical Map (1941-2003) shows the *property* as developed. First developed use can be concluded as a municipal airport at some time between 1932 and 1941 from the use of the USGS Topographical Maps.

The certified Sanborn Maps do not show the *property*.

The historical records used in this report do not reveal evidence that the *property* was used for industrial or manufacturing purposes. The Standard Historical Sources that were reasonably

ascertainable and likely to be useful were reviewed; however, a data failure occurred due to the *property's* uses not being identified at the required five year intervals.

5.4 Historical Use Information and Surrounding Areas

The USGS Topographical Maps depict the *property* as first being developed at some time between 1932 and 1941.

6 SITE RECONNAISSANCE

6.1 Methodology and Limiting Conditions

The objective of the site reconnaissance was to obtain information indicating the likelihood of identifying recognized environmental conditions in connection with the *property*. To the extent not limited by physical obstructions, the periphery of the *property* was visually and/or physically observed. The *property* was also observed from Vandenburg Drive and Frank Andrews Boulevard, the adjacent public thoroughfares.

The site reconnaissance began along the western property boundary and thence proceeded through the *property* in a clockwise manner as best as possible. Once the exterior of the *property* was observed, the interior of the buildings were observed to the extent possible.

Pan American Engineer's findings are based on the site visit on October 6, 2015 performed by Wesley Miller (PAE). Changes in the *property* or report data or incomplete disclosure of past or present site activities could alter Pan American Engineer's findings and conclusions associated with the Site Assessment. Information on the *property* provided to Pan American Engineers by individuals, owner, users and others has been accepted in good faith and is assumed to be accurate.

6.2 General Site Setting

The current use of the *property* is vacant overgrown pastureland. The *property* is bordered to the north and east by Union Tank Manufacturing Plant, on the south and west by commercial/industrial businesses and by a railroad on the west. Properties located adjacent or within close proximity to the *property* appear to be commercial, residential, and industrial. The current and past uses of the adjoining properties and surrounding areas do not appear to have changed in recent history.

The *property* is relatively flat and is approximately 85 feet above msl according to the 2003 USGS Topographic Map. The site is assumed to drain into Irish Ditch No. 2 thence into Bayou Rapides and ultimately into the Red River.

6.3 Exterior Observations

The *property* contains four abandoned structures; one metal shed (built prior to 1955) and three commercial structures (one of which was built prior to 1955 and the other two were built at some point between 1975-1981). The aforementioned age of the structures was determined by aerial imagery which can be seen in Appendix C and may not be accurate. All of the buildings have paved parking areas.

There are various paved roadways located on and along the *property*. There is a limestone road running through the *property* which traverses from the western side of the *property* to the northwest corner of the *property*. There is an abandon train rail which traverses through the *property* in a northerly/southerly direction and intersects the aforementioned limestone road.

Water and sewerage services are assumed to be available to the southern portions of the *property* as evidenced by existing buildings and water service appurtenances located along the roadways. The *property* is bordered to the north and east by Union Tank Manufacturing Plant, on the south and west by commercial/industrial businesses and by a railroad on the west.

Other pertinent items noted are as follows:

- A stockpile of miscellaneous rock/gravel with possible asphalt binder located near the western property line.
- A 100 gallon (approximate) above ground storage tank located near southwest property corner.
- A large commercial electrical transformer/meter located near the southeast property corner (next to the aforementioned 100 gallon above ground storage tank).
- Heating and cooling devices were observed for the three abandoned commercial buildings.
 All of the buildings were served by outdoor on-ground units. The fuel source is assumed to be electric for all devices.

6.4 Interior Observations

The interior of one of the commercial structures was viewed. Access to the other three structures was not available, as the structures were secure.

The observed building was found to be in a dilapidated state. The ceiling has caved in, mildewed walls and warn/peeling paint was observed.

7 INTERVIEWS

7.1 Interview with Owner/Site Manager

For the purposes of this report, the Owner, England Authority is represented by Mr. David Broussard, Airpark Development Manager. Mr. Broussard completed the questionnaire documents. The completed questionnaire is included in *Appendix E - Interview Documentation*.

7.2 Interview with User

The user interview was completed by Mr. David Broussard, Airpark Manager for England Authority. Mr. Broussard completed the interview and emailed it back to Wesley Miller (PAE) on November 3, 2015. The questionnaire completed in the interview is included in *Appendix E* - *Interview Documentation*.

7.3 Interviews with Local Government Officials

Mr. Joe Hamner, Fire Chief of England Airpark Fire Department was contacted via telephone on November 17, 2015 by Wesley Miller (PAE). Mr. Hamner stated that the site was formerly an Air Force petroleum yard. After the infrastructure was removed, the Air Force conducted extensive remediation work at the site.

8 FINDINGS

This section identifies known or suspect recognized environmental conditions, controlled recognized environmental conditions and historical recognized environmental conditions, and de minimis conditions.

<u>Finding 1</u> A data failure occurred due to the *property*'s uses not being identified at the required five year intervals (refer to section 5.1.1).

<u>Finding 2</u> The *property* was found in multiple databases (refer to section 5.1.1).

<u>Finding 3</u> One site was identified within the minimum search distance of the *property* under the following databases: FINDS, LA UST, LA DEL SHWS, LA NPDES, LA REM (refer to section 5.1.1).

<u>Finding 4</u> A stockpile of miscellaneous rock/gravel with possible asphalt binder was observed near the western property line (refer to section 6.3).

<u>Finding 5</u> A 100 gallon (approximate) above ground storage tank was observed near the southwest property corner (refer to section 6.3).

9 OPINION

This section includes the environmental professional's opinion of the impact on the *property* of conditions identified in the findings section (refer to Section 8.0). The following numbered opinions correspond with the numbered findings in Section 8.0.

Opinion 1 This finding is not considered to be a recognized environmental condition.

The finding is not considered to be a recognized environmental condition. Although the *property*'s use cannot be confirmed in 5 year intervals, the use of the *property* has been identified from its first developed use to its current use with no gaps in use identified.

Opinion 2 This finding is considered to be a recognized environmental condition.

The finding is considered to be a recognized environmental condition. This finding is considered to be a controlled recognized environmental condition. According to the "Base Wide Corrective Measures Implementation Work Plan for Land Use Controls Former England Air Force Base, Alexandria, Louisiana" dated May 2015, SWMU No. 179 (the *property*):

- Is restricted to industrial/commercial use only (Table 1) as part of a conveyance agreement between the Air Force and England Authority.
- The on-site soils were removed in 2014. The soil left in place meets non-industrial (residential) standards, and therefore a land use restriction is not required.
- If building construction is planned at the site, an enclosed structure evaluation must be performed and submitted to LDEQ prior to the start of construction.

Since LDEQ has restricted building construction on the site by requiring an enclosed structure evaluation, this finding is considered to be a Controlled Recognized Environmental Condition (CREC); which is considered a Recognized Environmental Condition.

Opinion 3 This finding is not considered to be a recognized environmental condition.

The finding is not considered to be a recognized environmental condition.

This site (Hertz Corporation) is located approximately 2,000 feet southwest of the *property*. The database findings are resolved as follows:

• LA UST – Three (3) on-site fuel storage tanks have a status of closed.

- EL SHWS Approved completion and evaluation, and closed on May 6, 2008.
- REM Approved Completion and evaluation, and closed on May 6, 2008.

Therefore, this finding is not considered to be a Recognized Environmental Condition with regards to the *property*.

Opinion 4 This finding is not considered to be a recognized environmental condition.

The finding is not considered to be a recognized environmental condition due to the lack of likely release to the site from a hazardous substance/petroleum product.

Opinion 5 This finding is not considered to be a recognized environmental condition.

The finding is not considered to be a recognized environmental condition because the tank does not appear to present a material threat of a future release nor is it obvious that a likely release to the site has been made from the above ground storage tank.

10 <u>CONCLUSIONS</u>

We have performed a *Phase I Environmental Site Assessment* in conformance with the scope and limitations of ASTM Practice E 1527 on property located at and around 2101 Frank Andrews Blvd., near Alexandria, Rapides Parish, Louisiana 71303, the *property*. Any exceptions to, or deletions from, this practice are described in Section 11.0 of this *report*. This assessment has revealed no evidence of *recognized environmental conditions* in connection with the *property* except for the following:

• The *property* was found in multiple databases. This finding is considered to be a controlled recognized environmental condition, which is a recognized environmental condition. See Opinion 2 in Section 9 for more information on this recognized environmental condition.

11 <u>DEVIATIONS</u>

This ESA exhibits no known deviations from ASTM E1527-13.

12 <u>ADDITIONAL SERVICES</u>

This section addresses environmental issues or conditions at the *property* that the user directed to be assessed that are outside the scope of ASTM E1527-13.

The User did not request the assessment of environmental conditions outside the scope of ASTM E1527-13.

EDR Historical Topographic Map Report

EDR Historical Topographic Map Report

Environmental Data Resources, Inc.s (EDR) Historical Topographic Map Report is designed to assist professionals in evaluating potential liability on a target property resulting from past activities. EDRs Historical Topographic Map Report includes a search of a collection of public and private color historical topographic maps, dating back to the early 1900s.

Thank you for your business.
Please contact EDR at 1-800-352-0050 with any questions or comments.

The EDR Aerial Photo Decade Package

EDR Aerial Photo Decade Package

Environmental Data Resources, Inc. (EDR) Aerial Photo Decade Package is a screening tool designed to assist environmental professionals in evaluating potential liability on a target property resulting from past activities. EDR's professional researchers provide digitally reproduced historical aerial photographs, and when available, provide one photo per decade.

When delivered electronically by EDR, the aerial photo images included with this report are for ONE TIME USE ONLY. Further reproduction of these aerial photo images is prohibited without permission from EDR. For more information contact your EDR Account Executive.

Thank you for your business.
Please contact EDR at 1-800-352-0050
with any questions or comments.

SURROUNDING SITES: SEARCH RESULTS

Surrounding sites were identified in the following databases.

Elevations have been determined from the USGS Digital Elevation Model and should be evaluated on a relative (not an absolute) basis. Relative elevation information between sites of close proximity should be field verified. Sites with an elevation equal to or higher than the target property have been differentiated below from sites with an elevation lower than the target property.

Page numbers and map identification numbers refer to the EDR Radius Map report where detailed data on individual sites can be reviewed.

Sites listed in **bold italics** are in multiple databases.

Unmappable (orphan) sites are not considered in the foregoing analysis.

STANDARD ENVIRONMENTAL RECORDS

Federal CERCLIS list

CERCLIS: The Comprehensive Environmental Response, Compensation and Liability Information System contains data on potentially hazardous waste sites that have been reported to the USEPA by states, municipalities, private companies and private persons, pursuant to Section 103 of the Comprehensive Environmental Response, Compensation and Liability Act (CERCLA). CERCLIS contains sites which are either proposed to or on the National Priorities List (NPL) and sites which are in the screening and assessment phase for possible inclusion on the NPL.

A review of the CERCLIS list, as provided by EDR, and dated 10/25/2013 has revealed that there is 1 CERCLIS site within approximately 0.5 miles of the target property.

Lower Elevation	Address	Direction / Distance	Map ID	Page
EEIDD (FORMER ENGLAN	1611 ARNOLD DR	SW 1/4 - 1/2 (0.475 mi.)	7	52

Federal RCRA CORRACTS facilities list

CORRACTS: CORRACTS is a list of handlers with RCRA Corrective Action Activity. This report shows which nationally-defined corrective action core events have occurred for every handler that has had corrective action activity.

A review of the CORRACTS list, as provided by EDR, and dated 03/10/2015 has revealed that there is 1 CORRACTS site within approximately 1 mile of the target property.

Lower Elevation	Address	Direction / Distance	Map ID	Page

Federal RCRA non-CORRACTS TSD facilities list

RCRA-TSDF: RCRAInfo is EPA's comprehensive information system, providing access to data supporting the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. The database includes selective information on sites which generate, transport, store, treat and/or dispose of hazardous waste as defined by the Resource Conservation and Recovery Act (RCRA). Transporters are individuals or entities that move hazardous waste from the generator offsite to a facility that can recycle, treat, store, or dispose of the waste.

A review of the RCRA-TSDF list, as provided by EDR, and dated 03/10/2015 has revealed that there is 1

RCRA-TSDF site within approximately 0.5 miles of the target property.

Lower Elevation	Address	Direction / Distance	Map ID	Page
EEIDD (FORMER ENGLAN	1611 ARNOLD DR	SW 1/4 - 1/2 (0.475 mi.)	7	52

Federal RCRA generators list

RCRA-CESQG: RCRAInfo is EPA's comprehensive information system, providing access to data supporting the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. The database includes selective information on sites which generate, transport, store, treat and/or dispose of hazardous waste as defined by the Resource Conservation and Recovery Act (RCRA). Conditionally exempt small quantity generators (CESQGs) generate less than 100 kg of hazardous waste, or less than 1 kg of acutely hazardous waste per month.

A review of the RCRA-CESQG list, as provided by EDR, and dated 03/10/2015 has revealed that there is 1 RCRA-CESQG site within approximately 0.25 miles of the target property.

Other Ascertainable Records

RCRA NonGen / NLR: RCRAInfo is EPA's comprehensive information system, providing access to data supporting the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. The database includes selective information on sites which generate, transport, store, treat and/or dispose of hazardous waste as defined by the Resource Conservation and Recovery Act (RCRA). Non-Generators do not presently generate hazardous waste.

A review of the RCRA NonGen / NLR list, as provided by EDR, and dated 03/10/2015 has revealed that there is 1 RCRA NonGen / NLR site within approximately 0.25 miles of the target property.

EDR HIGH RISK HISTORICAL RECORDS

EDR Exclusive Records

EDR US Hist Auto Stat: EDR has searched selected national collections of business directories and has collected listings of potential gas station/filling station/service station sites that were available to EDR researchers. EDR's review was limited to those categories of sources that might, in EDR's opinion, include gas station/filling station/service station establishments. The categories reviewed included, but were not limited to gas, gas station, gasoline station, filling station, auto, automobile repair, auto service station, service station, etc. This database falls within a category of information EDR classifies as "High Risk Historical Records", or HRHR. EDR's HRHR effort presents unique and sometimes proprietary data about past sites and operations that typically create environmental concerns, but may not show up in current government records searches.

A review of the EDR US Hist Auto Stat list, as provided by EDR, has revealed that there is 1 EDR US Hist Auto Stat site within approximately 0.25 miles of the target property.

Environmental Interest/Information System

AFS (Aerometric Information Retrieval System (AIRS) Facility Subsystem) replaces the former Compliance Data System (CDS), the National Emission Data System (NEDS), and the Storage and Retrieval of Aerometric Data (SAROAD). AIRS is the national repository for information concerning airborne pollution in the United States. AFS is used to track emissions and compliance data from industrial plants. AFS data are utilized by states to prepare State Implementation Plans to comply with regulatory programs and by EPA as an input for the estimation of total national emissions. AFS is undergoing a major redesign to support facility operating permits required under Title V of the Clean Air Act.

AIR EMISSIONS CLASSIFICATION UNKNOWN

Louisiana Tools for Environmental Management and Protection Organizations (LA-TEMPO) is an Integrated Management System.

RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.

Environmental Interest/Information System

US National Pollutant Discharge Elimination System (NPDES) module of the Compliance Information System (ICIS) tracks surface water permits issued under the Clean Water Act. Under NPDES, all facilities that discharge pollutants from any point source into waters of the United States are required to obtain a permit. The permit will likely contain limits on what can be discharged, impose monitoring and reporting requirements, and include other provisions to ensure that the discharge does not adversely affect water quality.

Incident Desc: Spill was from AST dispenser nozzle.

Incident Type Desc: Release/Spill, Miscellaneous

Fire truck dispensed fuel from AST and did not properly put back Comments:

dispensing hose. The tires drove over the hose and busted it. Only fuel from the hose was released to the concrete. The fire truck was

equipped with materials needed to clean up spill. Spill was

approximately one gallon and was immediately cleaned. Hose section was repaired. There were no releases to the environment. Non-reportable

quantity.

Event: Igration of Contaminated Groundwater under Control, Yes, Migration of

Contaminated Groundwater Under Control has been verified. Based on a review of information contained in the EI determination, it has been determined that migration of contaminated groundwater is under control at the facility. Specifically, this determination indicates that the migration of contaminated groundwater is under control, and that monitoring will be conducted to confirm that contaminated groundwater remains within the existing area of contaminated groundwater. This determination will be re-evaluated when the Agency becomes aware of

significant changes at the facility.

Event date: 06/30/2003

Event: Current Human Exposures under Control, Yes, Current Human Exposures

Under Control has been verified. Based on a review of information contained in the EI determination, current human exposures are

To maintain currency of the following federal and state databases, EDR contacts the appropriate governmental agency on a monthly or quarterly basis, as required.

Number of Days to Update: Provides confirmation that EDR is reporting records that have been updated within 90 days from the date the government agency made the information available to the public.

STANDARD ENVIRONMENTAL RECORDS

Federal NPL site list

NPL: National Priority List

National Priorities List (Superfund). The NPL is a subset of CERCLIS and identifies over 1,200 sites for priority cleanup under the Superfund Program. NPL sites may encompass relatively large areas. As such, EDR provides polygon coverage for over 1,000 NPL site boundaries produced by EPA's Environmental Photographic Interpretation Center (EPIC) and regional EPA offices.

Proposed NPL: Proposed National Priority List Sites

A site that has been proposed for listing on the National Priorities List through the issuance of a proposed rule in the Federal Register. EPA then accepts public comments on the site, responds to the comments, and places on the NPL those sites that continue to meet the requirements for listing.

NPL LIENS: Federal Superfund Liens

Federal Superfund Liens. Under the authority granted the USEPA by CERCLA of 1980, the USEPA has the authority to file liens against real property in order to recover remedial action expenditures or when the property owner received notification of potential liability. USEPA compiles a listing of filed notices of Superfund Liens.

Federal CERCLIS list

CERCLIS: Comprehensive Environmental Response, Compensation, and Liability Information System

CERCLIS contains data on potentially hazardous waste sites that have been reported to the USEPA by states, municipalities, private companies and private persons, pursuant to Section 103 of the Comprehensive Environmental Response, Compensation, and Liability Act (CERCLA). CERCLIS contains sites which are either proposed to or on the National Priorities List (NPL) and sites which are in the screening and assessment phase for possible inclusion on the NPL.

Federal CERCLIS NFRAP site List

CERCLIS-NFRAP: CERCLIS No Further Remedial Action Planned

Archived sites are sites that have been removed and archived from the inventory of CERCLIS sites. Archived status indicates that, to the best of EPA's knowledge, assessment at a site has been completed and that EPA has determined no further steps will be taken to list this site on the National Priorities List (NPL), unless information indicates this decision was not appropriate or other considerations require a recommendation for listing at a later time. This decision does not necessarily mean that there is no hazard associated with a given site; it only means that, based upon available information, the location is not judged to be a potential NPL site.

Federal RCRA non-CORRACTS TSD facilities list

RCRA-TSDF: RCRA - Treatment, Storage and Disposal

RCRAInfo is EPA's comprehensive information system, providing access to data supporting the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. The database includes selective information on sites which generate, transport, store, treat and/or dispose of hazardous waste as defined by the Resource Conservation and Recovery Act (RCRA). Transporters are individuals or entities that move hazardous waste from the generator offsite to a facility that can recycle, treat, store, or dispose of the waste. TSDFs treat, store, or dispose of the waste.

ADDITIONAL ENVIRONMENTAL RECORDS

Local Brownfield lists

US BROWNFIELDS: A Listing of Brownfields Sites

Brownfields are real property, the expansion, redevelopment, or reuse of which may be complicated by the presence or potential presence of a hazardous substance, pollutant, or contaminant. Cleaning up and reinvesting in these properties takes development pressures off of undeveloped, open land, and both improves and protects the environment. Assessment, Cleanup and Redevelopment Exchange System (ACRES) stores information reported by EPA Brownfields grant recipients on brownfields properties assessed or cleaned up with grant funding as well as information on Targeted Brownfields Assessments performed by EPA Regions. A listing of ACRES Brownfield sites is obtained from Cleanups in My Community. Cleanups in My Community provides information on Brownfields properties for which information is reported back to EPA, as well as areas served by Brownfields grant programs.

Other Ascertainable Records

RCRA NonGen / NLR: RCRA - Non Generators / No Longer Regulated

RCRAInfo is EPA's comprehensive information system, providing access to data supporting the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. The database includes selective information on sites which generate, transport, store, treat and/or dispose of hazardous waste as defined by the Resource Conservation and Recovery Act (RCRA). Non-Generators do not presently generate hazardous waste.

UMTRA: Uranium Mill Tailings Sites

Uranium ore was mined by private companies for federal government use in national defense programs. When the mills shut down, large piles of the sand-like material (mill tailings) remain after uranium has been extracted from the ore. Levels of human exposure to radioactive materials from the piles are low; however, in some cases tailings were used as construction materials before the potential health hazards of the tailings were recognized.

HIST FTTS: FIFRA/TSCA Tracking System Administrative Case Listing

A complete administrative case listing from the FIFRA/TSCA Tracking System (FTTS) for all ten EPA regions. The information was obtained from the National Compliance Database (NCDB). NCDB supports the implementation of FIFRA (Federal Insecticide, Fungicide, and Rodenticide Act) and TSCA (Toxic Substances Control Act). Some EPA regions are now closing out records. Because of that, and the fact that some EPA regions are not providing EPA Headquarters with updated records, it was decided to create a HIST FTTS database. It included records that may not be included in the newer FTTS database updates. This database is no longer updated.

Date of Government Version: 10/19/2006 Date Data Arrived at EDR: 03/01/2007 Date Made Active in Reports: 04/10/2007

RMP: Risk Management Plans

When Congress passed the Clean Air Act Amendments of 1990, it required EPA to publish regulations and guidance for chemical accident prevention at facilities using extremely hazardous substances. The Risk Management Program Rule (RMP Rule) was written to implement Section 112(r) of these amendments. The rule, which built upon existing industry codes and standards, requires companies of all sizes that use certain flammable and toxic substances to develop a Risk Management Program, which includes a(n): Hazard assessment that details the potential effects of an accidental release, an accident history of the last five years, and an evaluation of worst-case and alternative accidental releases; Prevention program that includes safety precautions and maintenance, monitoring, and employee training measures; and Emergency response program that spells out emergency health care, employee training measures and procedures for informing the public and response agencies (e.g the fire department) should an accident occur.

2020 COR ACTION: 2020 Corrective Action Program List

The EPA has set ambitious goals for the RCRA Corrective Action program by creating the 2020 Corrective Action Universe. This RCRA cleanup baseline includes facilities expected to need corrective action. The 2020 universe contains a wide variety of sites. Some properties are heavily contaminated while others were contaminated but have since been cleaned up. Still others have not been fully investigated yet, and may require little or no remediation. Inclusion in the 2020 Universe does not necessarily imply failure on the part of a facility to meet its RCRA obligations.

EPA WATCH LIST: EPA WATCH LIST

EPA maintains a "Watch List" to facilitate dialogue between EPA, state and local environmental agencies on enforcement matters relating to facilities with alleged violations identified as either significant or high priority. Being on the Watch List does not mean that the facility has actually violated the law only that an investigation by EPA or a state or local environmental agency has led those organizations to allege that an unproven violation has in fact occurred. Being on the Watch List does not represent a higher level of concern regarding the alleged violations that were detected, but instead indicates cases requiring additional dialogue between EPA, state and local agencies - primarily because of the length of time the alleged violation has gone unaddressed or unresolved.

US AIRS (AFS): Aerometric Information Retrieval System Facility Subsystem (AFS)

The database is a sub-system of Aerometric Information Retrieval System (AIRS). AFS contains compliance data on air pollution point sources regulated by the U.S. EPA and/or state and local air regulatory agencies. This information comes from source reports by various stationary sources of air pollution, such as electric power plants, steel mills, factories, and universities, and provides information about the air pollutants they produce. Action, air program, air program pollutant, and general level plant data. It is used to track emissions and compliance data from industrial plants.

EDR HIGH RISK HISTORICAL RECORDS

EDR Exclusive Records

EDR MGP: EDR Proprietary Manufactured Gas Plants

The EDR Proprietary Manufactured Gas Plant Database includes records of coal gas plants (manufactured gas plants) compiled by EDR's researchers. Manufactured gas sites were used in the United States from the 1800's to 1950's to produce a gas that could be distributed and used as fuel. These plants used whale oil, rosin, coal, or a mixture of coal, oil, and water that also produced a significant amount of waste. Many of the byproducts of the gas production, such as coal tar (oily waste containing volatile and non-volatile chemicals), sludges, oils and other compounds are potentially hazardous to human health and the environment. The byproduct from this process was frequently disposed of directly at the plant site and can remain or spread slowly, serving as a continuous source of soil and groundwater contamination.

EDR US Hist Auto Stat: EDR Exclusive Historic Gas Stations

EDR has searched selected national collections of business directories and has collected listings of potential gas station/filling station/service station sites that were available to EDR researchers. EDR's review was limited to those categories of sources that might, in EDR's opinion, include gas station/filling station/service station establishments. The categories reviewed included, but were not limited to gas, gas station, gasoline station, filling station, auto, automobile repair, auto service station, service station, etc. This database falls within a category of information EDR classifies as "High Risk Historical Records", or HRHR. EDR's HRHR effort presents unique and sometimes proprietary data about past sites and operations that typically create environmental concerns, but may not show up in current government records searches.

OTHER DATABASE(S)

Depending on the geographic area covered by this report, the data provided in these specialty databases may or may not be complete. For example, the existence of wetlands information data in a specific report does not mean that all wetlands in the area covered by the report are included. Moreover, the absence of any reported wetlands information does not necessarily mean that wetlands do not exist in the area covered by the report.

CT MANIFEST: Hazardous Waste Manifest Data

Facility and manifest data. Manifest is a document that lists and tracks hazardous waste from the generator through transporters to a tsd facility.

Sensitive Receptors: There are individuals deemed sensitive receptors due to their fragile immune systems and special sensitivity to environmental discharges. These sensitive receptors typically include the elderly, the sick, and children. While the location of all sensitive receptors cannot be determined, EDR indicates those buildings and facilities - schools, daycares, hospitals, medical centers, and nursing homes - where individuals who are sensitive receptors are likely to be located.

AHA Hospitals:

Source: American Hospital Association, Inc.

Telephone: 312-280-5991

USGS TOPOGRAPHIC MAP

Target Property Map: 5636763 RAPIDES, LA

Version Date: 2012

EDR's GeoCheck Physical Setting Source Addendum is provided to assist the environmental professional in forming an opinion about the impact of potential contaminant migration.

Assessment of the impact of contaminant migration generally has two principal investigative components:

- 1. Groundwater flow direction, and
- 2. Groundwater flow velocity.

Groundwater flow direction may be impacted by surface topography, hydrology, hydrogeology, characteristics of the soil, and nearby wells. Groundwater flow velocity is generally impacted by the nature of the geologic strata.

GROUNDWATER FLOW DIRECTION INFORMATION

Groundwater flow direction for a particular site is best determined by a qualified environmental professional using site-specific well data. If such data is not reasonably ascertainable, it may be necessary to rely on other sources of information, such as surface topographic information, hydrologic information, hydrogeologic data collected on nearby properties, and regional groundwater flow information (from deep aquifers).

TOPOGRAPHIC INFORMATION

Surface topography may be indicative of the direction of surficial groundwater flow. This information can be used to assist the environmental professional in forming an opinion about the impact of nearby contaminated properties or, should contamination exist on the target property, what downgradient sites might be impacted.

TARGET PROPERTY TOPOGRAPHY

General Topographic Gradient: General WNW

SURROUNDING TOPOGRAPHY: ELEVATION PROFILES

Source: Topography has been determined from the USGS 7.5' Digital Elevation Model and should be evaluated on a relative (not an absolute) basis. Relative elevation information between sites of close proximity should be field verified.

HYDROLOGIC INFORMATION

Surface water can act as a hydrologic barrier to groundwater flow. Such hydrologic information can be used to assist the environmental professional in forming an opinion about the impact of nearby contaminated properties or, should contamination exist on the target property, what downgradient sites might be impacted.

Refer to the Physical Setting Source Map following this summary for hydrologic information (major waterways and bodies of water).

NATIONAL WETLAND INVENTORY

NWI Quad at Target Property Data Coverage

NOT AVAILABLE YES - refer to the Overview Map and Detail Map

HYDROGEOLOGIC INFORMATION

Hydrogeologic information obtained by installation of wells on a specific site can often be an indicator of groundwater flow direction in the immediate area. Such hydrogeologic information can be used to assist the environmental professional in forming an opinion about the impact of nearby contaminated properties or, should contamination exist on the target property, what downgradient sites might be impacted.

Site-Specific Hydrogeological Data*:

Search Radius: 1.25 miles Status: Not found

AQUIFLOW®

Search Radius: 1.000 Mile.

EDR has developed the AQUIFLOW Information System to provide data on the general direction of groundwater flow at specific points. EDR has reviewed reports submitted by environmental professionals to regulatory authorities at select sites and has extracted the date of the report, groundwater flow direction as determined hydrogeologically, and the depth to water table.

LOCATION GENERAL DIRECTION

MAP ID FROM TP GROUNDWATER FLOW

Not Reported

GROUNDWATER FLOW VELOCITY INFORMATION

Groundwater flow velocity information for a particular site is best determined by a qualified environmental professional using site specific geologic and soil strata data. If such data are not reasonably ascertainable, it may be necessary to rely on other sources of information, including geologic age identification, rock stratigraphic unit and soil characteristics data collected on nearby properties and regional soil information. In general, contaminant plumes move more quickly through sandy-gravelly types of soils than silty-clayey types of soils.

GEOLOGIC INFORMATION IN GENERAL AREA OF TARGET PROPERTY

Geologic information can be used by the environmental professional in forming an opinion about the relative speed at which contaminant migration may be occurring.

ROCK STRATIGRAPHIC UNIT

GEOLOGIC AGE IDENTIFICATION

Era: Cenozoic Category: Stratifed Sequence

System: Quaternary Series: Holocene

Code: Qh (decoded above as Era, System & Series)

Geologic Age and Rock Stratigraphic Unit Source: P.G. Schruben, R.E. Arndt and W.J. Bawiec, Geology of the Conterminous U.S. at 1:2,500,000 Scale - a digital representation of the 1974 P.B. King and H.M. Beikman Map, USGS Digital Data Series DDS - 11 (1994).

DOMINANT SOIL COMPOSITION IN GENERAL AREA OF TARGET PROPERTY

The U.S. Department of Agriculture's (USDA) Soil Conservation Service (SCS) leads the National Cooperative Soil Survey (NCSS) and is responsible for collecting, storing, maintaining and distributing soil survey information for privately owned lands in the United States. A soil map in a soil survey is a representation of soil patterns in a landscape. Soil maps for STATSGO are compiled by generalizing more detailed (SSURGO) soil survey maps. The following information is based on Soil Conservation Service STATSGO data.

Soil Component Name: NORWOOD

Soil Surface Texture: silt loam

Hydrologic Group: Class B - Moderate infiltration rates. Deep and moderately deep,

moderately well and well drained soils with moderately coarse

textures.

Soil Drainage Class: Well drained. Soils have intermediate water holding capacity. Depth to

water table is more than 6 feet.

Hydric Status: Soil does not meet the requirements for a hydric soil.

Corrosion Potential - Uncoated Steel: HIGH

Depth to Bedrock Min: > 60 inches

Depth to Bedrock Max: > 60 inches

	Soil Layer Information							
	Boundary Classification							
Layer	Upper	Lower	Soil Texture Class	AASHTO Group	Unified Soil	Permeability Rate (in/hr)	Soil Reaction (pH)	
1	0 inches	13 inches	silt loam	Silt-Clay Materials (more than 35 pct. passing No. 200), Silty Soils.	FINE-GRAINED SOILS, Silts and Clays (liquid limit less than 50%), Lean Clay	Max: 2.00 Min: 0.60	Max: 8.40 Min: 7.40	
2	13 inches	37 inches	silt loam	Silt-Clay Materials (more than 35 pct. passing No. 200), Clayey Soils.	FINE-GRAINED SOILS, Silts and Clays (liquid limit less than 50%), Lean Clay	Max: 2.00 Min: 0.60	Max: 8.40 Min: 7.90	
3	37 inches	80 inches	silt loam	Silt-Clay Materials (more than 35 pct. passing No. 200), Silty Soils.	FINE-GRAINED SOILS, Silts and Clays (liquid limit less than 50%), Lean Clay	Max: 2.00 Min: 0.60	Max: 8.40 Min: 7.90	

OTHER SOIL TYPES IN AREA

Based on Soil Conservation Service STATSGO data, the following additional subordinant soil types may appear within the general area of target property.

Soil Surface Textures: silty clay loam

very fine sandy loam

clay

Surficial Soil Types: silty clay loam

very fine sandy loam

clay

Shallow Soil Types: No Other Soil Types

Deeper Soil Types: sandy clay loam

stratified

clay

LOCAL / REGIONAL WATER AGENCY RECORDS

EDR Local/Regional Water Agency records provide water well information to assist the environmental professional in assessing sources that may impact ground water flow direction, and in forming an opinion about the impact of contaminant migration on nearby drinking water wells.

Basewide Corrective Measures Implementation Work Plan for Land Use Controls Former England Air Force Base Alexandria, Louisiana

Air Force Civil Engineer Center 2261 Hughes Ave, Suite 155 Lackland AFB, Texas 78236-9853

TABLE 1

LAND USE CONTROL/INSTITUTIONAL CONTROL SITES

IRP/AOC	SWMU/	Site Description	COCs	Affected Media	LUC/IC
Site No	POI No.	-			
	8	OWS 2525	TPHs	Soil	Petroleum related site, soil sampling conducted (April and June 2012) ¹ . Additional groundwater evaluation planned 2015.
OT-25	28	World War II Bomb Disposal Area Site	Munitions	Soil	Munitions notification is included in the Deed.
WP-36 T-2	29	Wastewater Lagoon	Metals, PAHs	Soil	Conveyance Notification. Signage, fencing, gate, prohibit fishing, sediment excavation prohibited. Soil restricted to industrial/commercial use only (EDMS 18129422).
LF-15	41	General Refuse Disposal Site	Metals, PCBs, Pesticides, VOCs, PAHs, Phthalates	Soil, Groundwater	Long-Term Monitoring (Natural Attenuation). Engineered Cap, Signage, fencing, land restricted to industrial use, excavation prohibited, Solid Waste Notice required.
OT-44	44	Munitions Burial Site, Explosive Disposal Range	Munitions	Soil	Munitions clearance notification and industrial use restriction are included in the Deed (EDMS 27080952).
LF-09	45	General Refuse Disposal Site	Pesticides, Metals, PAHs	Soil	Solid Waste Notice. Soil restricted to industrial/commercial use only (EDMS 7772887).
LF-27 D-7	46	Construction Rubble Disposal Site	Metals, PAHs, VOCs	Soil	Solid Waste Notice. Soil restricted to industrial/commercial use only (EDMS 7772893).
LF-11	53	Chemical Burial Mound	Metals	Soil	Land restricted to industrial use*
LF-32	54	Construction Rubble Site	Solid Waste	Soil	Land restricted to industrial use, site used for waste disposal. Solid Waste

IRP/AOC Site No	SWMU/ POI No.	Site Description	COCs	Affected Media	LUC/IC
Bite 110	101110				Notice required*
FT-05	58	Fire Training Area No. 3		Soil	Land restricted to industrial use*
LF-16 D-5	61	Refuse Disposal Site	Metals, PAHs	Soil	Solid Waste Notice. Soil restricted to industrial/commercial use only (EDMS 7772883).
OT-22 D-2	62	Scrap Metal Disposal Site	Metals, SVOCs	Soil	Conveyance Notification. Soil restricted to industrial/commercial use only (EDMS 7772885).
LF-26	63	General Refuse Disposal Site	Metals, PCBs, PAHs, VOCs, Phthalates, Pesticides	Soil, Groundwater	Solid Waste Notice. Long-Term Monitoring (Natural Attenuation)-under SWMU 41 (LF-15). Soil restricted to industrial/commercial use only (EDMS 7772891). SWMU 63 approved for closeout (add EDMS number). SWMU 63 Solid Waste Notice to be rescinded and SWMU 41 Notice revised to clarify SWMU 63 closeout/inclusion in SWMU 41.
LF-30	64	Construction Rubble Disposal Site	Solid Waste	Soil	Land restricted to industrial use, site used for waste disposal. Solid Waste Notice required*
SS-42 S-04	92	Civil Engineering Supply Hazardous Waste Storage Yard	Pesticides, SVOCs	Soil	Conveyance Notification. Soil restricted to industrial/commercial use only (EDMS 7796667).
	141	OWS 2401, Former 860- gallon OWS at Refueling Vehicle Maintenance shop	TRPH	Soil	Petroleum Related Site. Restricted to industrial.
LF-28 D-09	163	Construction Rubble Disposal Site	Metals, PAHs	Soil	Solid Waste Notice. Soil restricted to industrial/commercial use only (EDMS 7772889).

Qualifications of the Environmental Professional

EDUCATION

Louisiana State University - B.S., Civil Engineering, 1976.

REGISTRATION

Registered Professional Engineer - Louisiana, Alabama, Arkansas, Colorado, Mississippi, Oklahoma and Texas

Registered Professional Land Surveyor - Louisiana

PROFESSIONAL SOCIETIES

Member - National Society of Professional Engineers, American Society of Civil Engineers, Louisiana Engineering Society, American Congress of Surveying and Mapping, and Louisiana Society of Professional Land Surveyors.

Chi Epsilon and Tau Beta Pi National Engineering Honor Societies.

PUBLICATIONS

Assisted in development of numerous articles and research for publication of Louisiana Real Property Boundary Law and Colorado Real Property Boundary Law.

EXPERIENCE SUMMARY

Professional experience since 1976. Responsible for ultimate delivery of completed design packages to clients and to insure quality completion of project.

Professional environmental experience includes producing and overseeing numerous Phase I Environmental Site Assessments.

Professional experience includes development of scope and design of numerous drainage, water distribution, sewage collection, local roadway, Interstate roadway, wastewater treatment, natural gas distribution, airport runways, water treatment plants, outdoor recreation, and traffic synchronization projects. Extensive experience with Federal funding agencies including U.S. Army Corps of Engineers, Environmental Protection Agency, Farmers Home Administration, Housing and Urban Development, Economic Development Administration, and Federal Highway Administration.

Field assignments have included control and route surveys for Interstate Highway, resident inspection of waste and wastewater treatment plants, numerous water distribution and sewage collection systems, and several apartment developments ranging from 40 units to over 300 units, structural field investigations of existing buildings for structural reports, and hundreds of boundary and topographic surveys.
